

AMAZINGLY BOUNTIFUL REMARKABLY SUSTAINABLE

POTTING SOIL

Encourages Vigorous Indoor & Outdoor Plant Growth

Organic Harvest's Potting Soil is a unique blend of special ingredients designed for use in pots, containers and raised beds. Mixed to professional standards, our Potting Soil is ideal for indoor and outdoor plants. It is formulated to be used straight without additives. It is also pH-balanced to encourage strong plant growth. Acid-loving plants thrive in our organic Potting Soil because of its peat moss content.

Ingredients include peat moss, compost, pumice, ground fir bark, sand, calcium carbonite lime, gypsum.

GENERAL USE INSTRUCTIONS:

To start, fill your raised bed, pot, or container with Organic Harvest's Potting Soil. That's it! Now you're ready to plant! To ensure your plants have enough growing medium after settling, fill the container slightly higher than your desired final level as over time the soil will settle by about 20%. This all-in-one mix is specially formulated with nutrients and boasts a balanced pH, eliminating the need for additional amendments. Simply fill, plant, and watch your plants thrive!
